Visual Studio 2015 professional is installed in the PCs of EE Labs.
As the licensed product number cannot be released to the students, this version was not available for students to install in their own computers.

Instead, students can download the Visual Studio 2017 community at the link given below, this version is free for students.

https://visualstudio.microsoft.com/downloads/

The following link shows how to download and install the visual studio 2017 community, writing the first C++ hello world project and running VS2017 C++ project on VS2015 C++ environment.

http://www.ee.cityu.edu.hk/~cycheng/vs2017/

Students can have a look on this to start up with VS2017 on their own computers.

If you have questions about the software installation, please contact Mr. C Y Cheng in room P1442.
